Employment

LaunchDarkly – Senior Product Manager, Head of Metrics and Data Platform Mar 2025 - Current

- Built an LLM-as-judge evaluation dashboard as the MVP of a cross-team analytics platform, unifying query APIs and frontend components across observability trace and SDK event data. Reduced new data visualization feature development to ~1 day.
- Worked directly with customer data science and engineering teams to define and ship new experimentation features for a \$1.3M ARR deal. Built a shared metric query library to accelerate these features across warehouse-native and hosted pipelines, cutting delivery time of new features across these pipelines from 4 weeks to 1 week.
- Increased activation for A/B testing features by launching [Metric Filters](#) and [Guardrail Metrics](#) to simplify event instrumentation and define defaults for rollouts at enterprise scale, contributing to deals of ~\$3M ARR across enterprise customers in one quarter.
- Set product direction for three customer-facing and platform teams based on direct market and customer feedback.
- Established a quarterly OKR template and joint PM-PMM updates to improve execution and field alignment.

Datadog – Product Manager, Revenue Engineering Jun 2021 - Mar 2025

- Designed and shipped a Cost Attribution UX and API that reduced customers' monthly financial workflows from two weeks to two hours and supported renewals for enterprise accounts with over \$1M ARR.
- Built the next-generation usage data experience in Datadog dashboards by migrating high-cardinality data (>5M dimensions per hour per enterprise) from Postgres to a proprietary datastore; paired user interviews with rapid prototyping to shape the product.
- Priced and implemented billing for 15+ new SKUs based on customer value, margin, and simplicity, capturing \$10M ARR.
- Refactored AWS, GCP, Azure Marketplace integrations to capture an additional ~\$5M ARR from previously unsupported deals.
- Led quarterly OKR planning process across three product verticals and seven engineering teams.

N26 – Product Manager Apr 2019 - May 2021

- Launched N26's US banking product by building integrations for MVP bank payments, compliance tools, and mobile app.
- Increased the account creation conversion rate by 13% by identifying key drop-off points in onboarding flow and implementing in-app photo and document verification for Know-Your-Customer processes.
- Prioritized and built a debit-card rewards program based on user interviews, increasing weekly transaction activity by 5%.
- Validated customer need and implemented Apple Pay and Google Pay integration, leading to 36% adoption of all active users.
- Built a mission-critical data quality and banking compliance reporting platform to reduce error rate from 15% to <1%. Cut report generation time from one week to one day by identifying key pain points in the banking operations user journey.

BlackRock – Corporate Strategy & Development Associate Aug 2016 - Apr 2019

- Partnered with executive leadership to develop firmwide and segment-specific growth strategies. Sourced, evaluated, and integrated M&A opportunities core to BlackRock's strategy.
- Built the valuation model for iShares-Royal Bank of Canada sales and distribution joint venture. Conducted due diligence and led a data-sharing strategy between companies to enable operations of the joint venture.
- Bootstrapped BlackRock's sustainable investing strategy and market positioning. Clarified investor value proposition for sustainable investing by leading 50+ client interviews and customer research.
- Developed and implemented sustainable investing criteria by interviewing investors and prioritizing investment frameworks.

Braze – Data Analyst Nov 2015 - May 2016

- Analyzed in-app user purchasing data to recommend optimizations to increase ROI of inbound marketing.
- Defined and instrumented site tracking and performance marketing metrics for website relaunch.
